Back Off!: How to Confront and Stop Sexual Harassment and Harassers

by Martha Langelan

Back Off! is filled with real-life success stories from women who have stopped harassers cold: - Sharon, who succeeded in stopping a whole crew of habitual harassers in a city park . . . - Stephanie, a ten-year-old who confronted and escaped a child molester . . . - Catharine and Molly, who stood up to their landlord and stopped him from harassing the tenants . . . and dozens more. From an eight-year-old who successfully challenged two young harassers on the playground to an organized group of fifty women who confronted a dockworker in response to an attempted rape on the job, here's what they did, how they did it - and how you can do it, too. Back Off! is the first book to focus on the direct-action tactics that work and the first to deal with harassment everywhere it takes place, in both blue-collar and white-collar jobs, at school, on the street, on the bus or subway, in the park, even in church. Back Off! examines the dynamics of sex and power in sexual harassment, the motives behind harassers' actions, and why traditional responses such as appeasement or aggression don't work, and describes the successful resistance strategies that you really can use - including nonviolent personal confrontation techniques, group confrontations, administrative remedies, and formal lawsuits.

Beauty Bites Beast: The Missing Conversation about Ending Violence

by Ellen Snortland

Beauty Bites Beast is not a “how-to” book, it is a “how-come” book.

As in, “how-come” every woman and girl needs to know how to defend themselves. They, like all females of other species in the world, are capable of defending themselves and their loved ones -- if they learn how. It is not the female’s size, it is her culturally induced ignorance that makes her think she is helpless. Beauty Bites Beast is a clarion call to “sleeping beauties,” so they can wake up and take charge of their own self-defense -- emotional, verbal and physical. The book also celebrates women (and kids) who fought back and won. Funny and provocative, this is both an irreverent and deadly serious look at how family, religion, history, news, and entertainment keep women thinking they are defenseless.

Domestic Violence for Beginners

by Alisa del Tufo

Throughout history, men have found ways to justify mistreatment and violence toward women. Despite differences of language, religion, and custom, women are beaten by their male partners throughout most of the world. This book traces the causes of domestic violence, beginning with the astonishing revelation that spousal abuse has been condoned - if not recommended - by each of the major world religions and including the impact of “the nuclear family” and “Big Daddy” Sigmund Freud. The book also examines the traumatic effect that Domestic Violence has on children and the monumental public indifference to spousal abuse, both issues horrifically exemplified in recent headlines. Domestic Violence for Beginners tries to take a constructive approach by not only criticizing the existing institutions by suggesting realistic alternatives, that is, the best treatments currently available and...most importantly...where to go for HELP!

Lifelines: Women, Male Violence, and Personal Safety

by Marcia Hall

This book provides a “lifeline” of information and skills for the most basic of human needs—personal safety. Male violence against women in all its forms remains a leading cause of death, disability, and injury to women of all ages in the United States. Lifelines offers a comprehensive, holistic approach to being safe and staying safe. From the psychological impact of trauma and how it destroys self-protective capacity, to the who, what, where, and how of violence against women, this book promotes hope, knowledge, skill building and competency as counteractions to fear and violence. Lifelines advances personal safety by weaving the personal, the political, and the pragmatic on a subject often ignored and systematically distorted. This book articulates the necessity and means for women to strengthen individual resources to care for themselves, to embrace safety, to learn defensive skills and behaviors, and ultimately promotes a social permission to do so.

Real Knockouts: The Physical Feminism of Women's Self-Defense

by Martha McCaughey

An examination of women's self-defense culture and its relationship to feminism. I was once a frightened feminist. So begins Martha McCaughey's odyssey into the dynamic world of women's self-defense, a culture which transforms women involved with it and which has equally profound implications for feminist theory and activism. Unprecedented numbers of American women are learning how to knock out, maim, even kill men who assault them. Sales of mace and pepper spray have skyrocketed. Some 14 million women own handguns. From behind the scenes at gun ranges, martial arts dojos, fitness centers offering Cardio Combat, and in padded attacker courses like Model Mugging, Real Knockouts demonstrates how self-defense trains women out of the femininity that makes them easy targets for men's abuse. And yet much feminist thought, like the broader American culture, seems deeply ambivalent about women's embrace of violence, even in self-defense. Investigating the connection between feminist theory and women physically fighting back, McCaughey found self-defense culture to embody, literally, a new brand of feminism.

Training Women in the Martial Arts: A Special Journey

by Jennifer Lawler and Laura Kamienski

Training Women in the Martial Arts is for male and female martial arts instructors, female martial arts students, and supporters of women in the martial arts. The book is designed to help people involved in the martial arts understand the challenges women face when training and help them create and provide appropriate martial arts and self defense instruction.

The obstacles female students face, both in and out of the training hall often go unrecognized. By educating themselves, students become better prepared to overcome these hurdles. Instructors can offer more appropriate and effective instructions- thereby retaining students and helping women achieve their martial arts goals.

There is no direct competition, since this is the only book that directly targets training women in the martial arts. Most how-to martial arts books are written primarily with men in mind and women's experiences differ dramatically from men's.
