

4th International Conference on Neurology & Neurological Disorders

[SciTechSeries](#) is thrilled to announce the "[4th International Conference on Neurology & Neurological Disorders](#)" (Neurology 2026) and extends a warm invitation to participants from around the world. This prestigious event is scheduled to take place in **Paris, France**, and **Online** from **October 15-16, 2026**, in a hybrid format.

This hybrid model offers participants the flexibility to join in person in Paris or virtually from anywhere across the globe, ensuring broad accessibility and engagement.

The central theme of Neurology 2026 is “**Integrating Science and Innovation to Transform Neurological Care**” emphasizing the conference’s vital role in driving progress and collaboration within the global neurology community.

[Neurology 2026](#) serves as a pivotal platform for exchanging cutting-edge insights, discussing emerging challenges, and exploring innovative solutions in the field of neurology and neurological disorders. The conference aims to strengthen neurology education, promote interdisciplinary collaboration, and inspire the next generation of neurologists and neuroscientists.

We warmly welcome scientists, clinicians, researchers, academicians, and industry leaders to join us at Neurology 2026—an event dedicated to shaping the future of neurological research, care, and innovation worldwide.
